

Specialist Ductwork Solutions

Oil & Gas Sector

HVAC Ductwork, Fabrication and Engineering Solutions
CONSTRUCTION | OIL AND GAS | MARINE | RENEWABLES

- Established 1977
- Operating from a 40,000sq ft. production facility
- Unique patented ductwork system – ideal for Offshore Sector
- Full Design, manufacture and Pre-Fit Fabrication Solution
- 95% of products manufactured inhouse
- Extensive portfolio of offshore projects

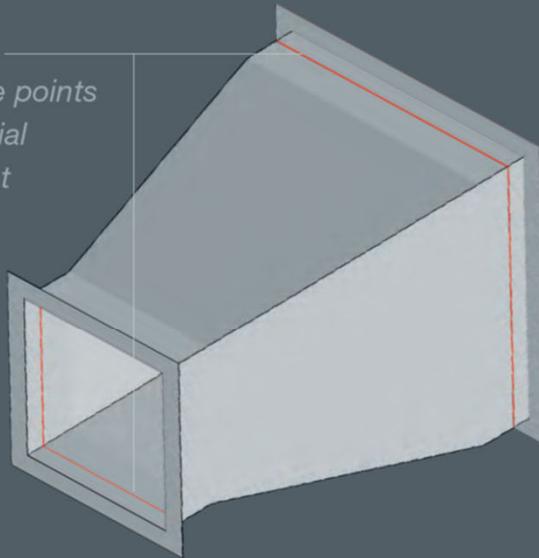

TITE-LITE DUCTING SYSTEM

Add-on Flange

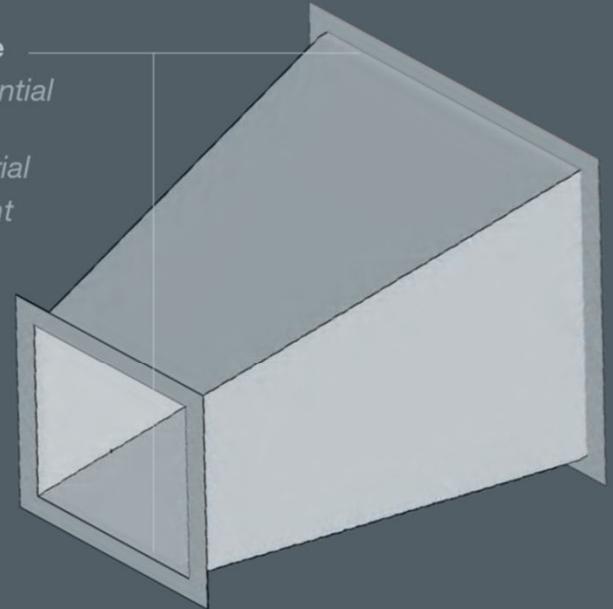

- Potential leakage points*
- Additional material*
- Additional weight*

Conventional Ducting

Integral Flange

- Eliminates potential leakage*
- Reduces material*
- Reduces weight*

TITE-LITE™ Ducting

TITE-LITE DUCTING SYSTEM – KEY BENEFITS

- Reduced materials for a lighter, more flexible ducting system
- Reduced installation costs by minimising components
- Improved air flow performance by reducing leakage
- Improved air flow, reducing ongoing operational costs

QUALITY & ACCREDITATIONS

PROJECT PORTFOLIO

Oil & Gas Sector

HVAC Ductwork, Fabrication and Engineering Solutions

CONSTRUCTION | OIL AND GAS | MARINE | RENEWABLES

- A wellhead platform (WHP) and a process utility and quarters platform (PUQ) were constructed, along with a bridge to connect them.
- Manufacture of over 100 tonnes of fully welded ductwork fabricated from 3mm stainless steel sheet.

- Oil Field located in the UK North Sea in 135m-Deep Waters.
- Manufacture of over 150 Tonnes of TITE-LITE Ductwork, Fabricated from 3mm Stainless Steel Sheet.

PROJECT - CYGNUS ALPHA

- Consists of four platforms, including two drilling centres which target a total of ten wells.
- Manufacture of over 160 tons of fully welded stainless steel HVAC Ductwork.
